Infinidura™ bamboo poles are more than just materials; they are the pillars of sustainable living. Each pole is pressure-treated to extract the starch and infuse it with boric salt. BGB's proprietary treatment promises durability, free from the concerns of termites and decay. Kiln-dried to retain structural integrity throughout its long life, they offer the reliability and uniformity essential for your peace of mind.

Infinidura™
The Essence of Sustainable Living

INFINIDURA™

Available in various sizes

Length	Diameter
6 meters	6 inches
5 meters	5 inches
4 meters	3 inches
3 meters	

INFINIDURA™

With **Infinidura™**,
you're not just
choosing a product.
You're embracing a
vision of sustainability,
purpose, and beauty.
Let's build a future
where every choice
nurtures the planet
and enriches our lives.

Be part of a
movement towards a
more sustainable and
beautiful world.

Choosing **Infinidura™** connects you to a
larger purpose. Our bamboo poles are
sourced from farms that nurture the earth,
sequestering carbon and rejuvenating the
soil. These giant bamboos protect vital
watersheds, like the Upper Pulangi
Watershed, the second-largest watershed in
the Philippines. It supports 100,000 hectares
of rice lands and potable water needs of two
cities and 22 municipalities.

This isn't just about building or creating;
it's about contributing to a cycle of wellness
that benefits the planet and future
generations.
