**Infinitanium™** begins its journey as bamboo strips, which are then transformed through a proprietary process involving pressure treatment with boric salt and lamination. This not only imparts remarkable resistance to termites and wood borer insects but also eliminates starch, enhancing its durability. *Pressure-treated and kiln-dried*, Infinitanium™ is your choice for moisture-controlled, quality lumber that stands the test of time.

## **Infinitanium™** **The Foundation of** **Durability**

**Infinitanium™ has fire-retardant properties and insulates against temperature differences and noise.**

## **INFINITANIUM™**

Available  
in the following  
sizes

Width	Height	Length
2"	2"	8'
4"	4"	8'
Any combination of width and height up to 6"		4' up to 10'
Board sizes from 1/4" x 4' x 8' to 2" x 4' x 10'		

# INFINICORE™

Available  
in the following  
sizes

Width	Height	Length
2"	2"	8'
4"	4"	8'
Any combination of width and height up to 6"		4' up to 10'
Board sizes from 1/4" x 4' x 8' to 2" x 4' x 10'		

subject to the availability of Guod

## Infinicore™ The Essence of Strength.

Taking the robust foundation of Infinitanium™ to new heights, Infinicore™ utilizes the "guod" or base section of the bamboo, known for the densest part of the culm. This process yields a denser, stronger laminated bamboo, ideal for furniture and applications where the hardest material is required. Infinicore™ represents the pinnacle of strength and durability in bamboo-based materials.
