In an age where the climate crisis looms large, choosing **Infiniweave™** is a statement of purpose and wellness. The natural insulation properties of bamboo ensure that your spaces remain cool and comfortable, providing a sanctuary from the increasing heat of our changing climate. By integrating **Infiniweave™** into your architecture and design, you're not just crafting spaces; you're nurturing environments where comfort meets sustainability.

## **Infiniweave™** **The Essence of** **Sustainable Living**

**Infiniweave™ has fire-retardant properties and can insulate against temperature differences and noise.**

Bare	w/o sealer

# INFINIWEAVE™

At BGB, we believe that true sustainability starts at the source. Our Dendrocalamus Asper bamboo is harvested from ecologically respectful farms, emphasizing practices that protect the soil, sequester carbon, and rehabilitate watershed areas.

Our **Infiniweave™** panels are meticulously woven from the Dendrocalamus Asper giant bamboo, known for its robustness and elegance. Each panel tells a story of resilience, beauty, and environmental stewardship. Available in both 4x8 and 4x4 sizes, with the option of showcasing the natural bamboo skin, **Infiniweave™** offers versatility without compromising on quality. Treated with our special wood sealer and undergoing both pressure treatment and kiln drying, each panel guarantees durability, termite resistance, and moisture control.
